Friend Whaley

I do not think you will be surprised to learn I have entered business on my own account, as you no doubt think. I have kept books for other parties long enough times have changed since you were in New York or Jamaica. At present my wife runs daily looking for something to do, I was associated with a first rate man who had a business of about 3 years standing and stands high in the Community for integrity and morality as you know I would not associate myself with any person unless he was in good standing business is rather dull but we cannot complain it is as good as bookkeeping was in those dull times, my family are all well and are living in the same house shall probably continue there till I get one of my own I hope you and yours are well and that business is prosperous and that you have

got something better than "Kafolio" that
was a bad investment think you will not
be caught again in such operations give my
respects to Mrs W & remember me to your
little boy I think his name is Frank, now
while I am writing I want say a little
business I want you to give us an order
for some Flour I can send you an
article that I know will sell for \$5-25 or
no Cartage added time 3 or 4 days. should the
price be lower what I mean your order
I will make the ~~difference~~ do not think
it will be any ^{high} this price is for a top top article
and I want you to give me an order for
some - if you have any thing to sell
in this market should be pleased to receive
the Commodity and will take care of your
interest though that you will know, if you
can recommend any Customers for Flour please
do so & we will attend to their orders, by your
recommendation we take it for granted that
parties are responsible wishing to hear from you
by return of Steam I remain
Yours truly

Pro. A. Steinkeyer Esq.
Capt. Napoleon Capp. Abrie
near Telegraph City, Cal:
My dear Sir—

Let me introduce to you, Mr. Thos. Whaley, bearer, who visits the mine partly on my account, as I cannot now spare time. He has 115 feet of our stock, which he has owned a long time. I have, now, 87 feet. Our object in his visit, is to gather by conversation with you, and examination of the mine and its surroundings, what success we can obtain to hope that we shall in good time

emerge from the gloom that seems to have fallen on the affairs of the mine. The stock, as you are aware, has been heavily assessed since the present management took hold, and greatly depreciated in value, so that it is now offered @ \$15. and only \$10. bid, per share. Doubtless this is in part owing to the failure of the New York scheme for sale of the mine, which failure is not to be wondered at considering the bungling way in which the scheme was attempted to be put through.

The board Trustees are greatly to blame for leaving the ass't for purchase of the contract, without making the purchase conditional on success of the scheme which was asserted to be the principal object of the ass't and purchase. They are however sufferers with ourselves.

I beg you will extend to Mr. Whaley the courtesies and hospitalities which you always exhibited to me. Please let him see and understand everything

as far as your duties will
allow you to show him around
and your explanations enable
him to understand.

I continue to be
Yours very truly

News of the Day.

We have a strange story by the telegraph to-day. The Brigadier-General, Briscoe by name, in command of Lynchburg, Va., since the surrender of Lee, turned burglar and stole a large portion of the Government funds deposited at his post. He was discovered in the act by detectives sent from Washington to observe his conduct. After he took the money out of the safe, in the Quartermaster's store, he attempted to set fire to the place. Nothing like this has ever, we believe, transpired in military annals—a high officer turning burglar! Briscoe is reported to be an Irishman by birth.

The South Carolina Convention has adjourned. It has gone to the very extremity of liberalism in one direction. It has ordained that European immigrants, who have declared their intention to become citizens, shall be permitted to vote after two years residence in the State. There is somewhat of a revolution in ideas here. The Montgomery Constitution which South Carolina accepted four years ago, so rapturously, made no provision for naturalization at all. This is not the only change that has come over the dreams of this little State during the year of grace, 1865.

The Georgia Convention, following in the wake of its mistress, South Carolina, has magnanimously repealed its ordinance of secession. Seeing that that document has been torn to shreds by the war, we do not see what necessity there was for its repeal. The armies of the United States have long ago set these instruments aside. Bullets settled that question; but, we presume, the old secessionists down in Georgia must have their say out.

Jeff Davis has been transferred from his casemate to a building inside of Fortress Monroe, called Carroll Hall. It is believed that this is a movement preparatory to his trial.

The news from abroad to-day is not specially interesting.

The Copper Interest of California.

The copper interest of California is rapidly growing. The State is rich in silver and gold, but it is also rich in copper. There are all kinds of copper ore, from all kinds of mines, and in all kinds of quantities. Some of the mines produce all kinds of quantities of ten per cent. ore, and millions of tons of twenty per cent. ore, but even the latter percentage will not pay for transplanting the mineral from some of the mines in Tulare, Siakiyou, Plumas, and San Bernardino counties. Not less than fifteen counties, reaching from San Diego to Del Norte, have large and well-known lodes of copper ore exceeding ten per cent. in richness. Unfortunately, freight is so high that only those mines nearest the market have yet been profitable. Among these is the Union at Copperopolis, which ships a hundred and ten tons of ore per day, the ore being first class—that is containing twenty per cent. of metal. The mine has been opened to a depth of 470 feet, and to a length of 500 feet on the lode, which is very wide, and regular, so the supply of ore seems to be almost inexhaustible. It is, without doubt, one of the most valuable copper
