

SAN DIEGO DAILY SUN

MARCH 6, 1889

THE CITY CHARTER.

SENATOR HOWERS DEFEATS A MOTION TO HURRY IT.

The Relative Influence of the Beach Company and the Citizens Shown by the Senate's Vote.

[Associated Press Dispatches to the Sun.]

SACRAMENTO, March 6.—The Senate did not adjourn until 2 o'clock this morning. It met again this morning at 11. Senator Howers offered a resolution adopting the San Diego charter. Senator Sprague moved to refer it to the Judiciary Committee. He understood that the charter gave the Common Council supervision over the new Board of Harbor Commissioners, which was plainly illegal. Senator Howers said the cause of the trouble was that a big corporation of San Diego had employed two attorneys to come here and fight this charter. The question was whether the corporations of San Diego should be allowed to run that town. The motion to refer was lost. Ayes, 2; noes, 33. The resolution was then laid over for consideration.

Senator McComas presented a petition from residents of Los Angeles asking for the creation of the county of Orange and asked that the bill be made a special order to follow Glenn county. It was so ordered.

DESPERATE ARABS.

They Attack the Germans and are Repulsed.

ZANZIBAR, March 6.—Reports have been received of severe fighting on the Zanzibar. Sunday the Arabs attacked the German landing party furiously, but were driven off by the combined forces of the men-of-war. They fought desperately, never receding an inch until the dead and dying lay around in large numbers. There was no attempt at flight until their Chief, Hashesi, fell mortally wounded. The Germans recaptured two cannon, which the natives secured in a former battle. No effort was made to take prisoners. The Germans are now strongly entrenched at Bagonoyo and will hold the place permanently to smooth the way for Veisnuan's expedition.

THE NEW CABINET.

California Congressmen Express Their Views on the Subject.

WASHINGTON, March 5.—Representative Morrow, speaking of the new Cabinet, said: "It is the best that has been

but there has been no steps taken to change the situation. To-night it is announced that an application for a quo warranto will be made to the Supreme Court by General Hoff to-morrow. Meanwhile Wilson maintains his hold upon the executive offices and is Governor to all outward appearances. Carr has made no move visible upon the surface.

RAILROAD MAGNATES MEET.

Humored Relations of the Santa Fe and Southern Pacific.

SAN FRANCISCO, March 6.—U. P. Huntington is expected here sometime next week from the City of Mexico, on his way to this city; also D. H. Robinson and W. A. Biesel, of the Santa Fe system. Should railroad men have a meeting here at this time, the visit of these officials of the two great railroad systems upon which the California trade depends is significant, and particularly so when taken in connection with the reported purchase recently of a large block of the Santa Fe stock by Jay Gould and Mr. Huntington. The belief is that all traffic arrangements relative to the California trade are about to be arranged between the Southern Pacific and the Santa Fe. It is thought the adjustment of facts will result in the new Wolfhill depot of the Southern Pacific at Los Angeles being made into a union depot. The traffic agreement, it is also predicted, will make the Missouri Pacific (Jay Gould's system) and the Santa Fe work in harmony with the Kansas, Nebraska, Missouri and Texas, where competition between the systems has heretofore been especially bitter.

Retired With His Reward.

YUMA (Arizona), March 6.—Conductor Sam Gillespie of the Southern Pacific, who won the \$2000 reward for capturing Ford, the Peoria emberzler, on his train while passing through this section, has retired from the road and leased the hotel here. It is full of consumptives from other States.

Life in Texas.

TEXAS, March 6.—Alfred and Herbert Rother had a shotgun fight with Tom and Hugh Matlock. The latter was killed, Tom Matlock is dying, and Alfred Rother was shot in the arm. The trouble grew out of a lawsuit, in which Tom Matlock's testimony offended Alfred Rother.

Five Millions Lost.

BOSTON, March 6.—It is reported that A. 1 percent price, Chile bars, average cost, 150,000 tons, surplus copper, now in the hands of a syndicate, shows a loss of \$5,000,000.

Steamboat Travel Delayed.

PORTLAND, (Or.) March 6.—The strike of captains, engineers, and pilots, of the O. N. river steamboat division, is causing much annoyance. No boats have left the

THE WAR IN HAYTI.

LEGITIME TO MAKE A DESPERATE CAMPAIGN.

A Shipload of Arms, Equipments and Ammunition on Its Way to Him.

[Associated Press Dispatches to the Sun.]

NEW YORK, March 6.—The steamer Prince William is en route to Port au Prince with a large quantity of cannon, ammunition and small arms, consigned to Legitime, who intends to make a last desperate attempt to defeat the insurgents and obtain complete control of Hayti.

SENATORIAL DIGNITY.

The Upper House Will not Wait Long for Nominations.

WASHINGTON, March 6.—The Senate met at noon to-day for six minutes and afterwards adjourned. The galleries were loaded with people who were greatly disappointed. If Mr. Harrison has any nominations to make they must be sent early in the day.

The Ex-President's Movements.

WASHINGTON, March 6.—Ex-President Cleveland and Mrs. Cleveland left for New York in a special car this morning.

King Milan Abdicates.

BELGRADE, March 6.—King Milan has abdicated the throne of Serbia, and Crown Prince Alexander will be proclaimed King to-morrow.

BOARD OF SUPERVISORS.

An Official Report of Two Days' Session—School Bonds.

March 4.

The Board met on the morning of March 4th, at 10 o'clock. All members present.

In the matter of the map of South Oceanside, filed March 7, 1887, and September 14, 1887, it was ordered that the maps be cancelled from this date, and that the map filed this date by J. Chauncey Hayes is made the official map.

In the matter of Sheriff's watchman, it was ordered that the Sheriff appoint two watchmen to serve at the Court-house, one to serve at night and the other to serve during the day, each to receive a salary of \$1 per day.

In the matter of Court bailiff, it appearing to the Board that as the Sheriff is required to provide a deputy to attend the sessions of the Superior Court, that the

A PAPER ON CREMATION.

READ BEFORE THE SAN DIEGO SOCIETY OF NATURAL HISTORY.

George W. Barnes, M. D., gives Some Reasons Why He Favors Cremation—The Process Described.

Having been asked for some expression upon the subject of cremation, I beg the privilege of submitting, briefly, a very few of the many and weighty reasons I have for favoring incineration in preference to inhumation of the dead.

First, reasons based on sanitary grounds are more important. The earth is the most convenient depository for putting out of sight whatever is offensive or deleterious or cannot be tolerated above its surface. The soil is not, however, always destructive but often preservative of the products of animal and vegetable decomposition. It is more than a probability that pestilential diseases are by earth-burial transmitted from one generation to another and thus perpetuated indefinitely.

If the seeds of plants can be preserved for centuries and then under favoring conditions be made to germinate and reproduce their kind, so the germs of contagious disease, after having been entombed for ages may be warmed into life under suitable environment and spread contagion among the living. To this source may often be attributed the sudden outbreak of epidemics and the occurrence of forms of disease not previously known in the locality. Evidence is not wanting that bodies which had perished from infectious disease on being exhumed, or the products of their decomposition disturbed many years after interment, have communicated the same disease to the living. A full acceptance of modern theories of germ pathology need not be implied in the belief that from this Pandora's box or mummy dust a flood of evils may desolate the land. If phosphorescent and gaseous emanations may ascend from decaying bodies through a considerable stratum of earth whether harmless in themselves or not they may be the vehicles for carrying the seeds of disease to the living. In view, therefore, of the frequency with which such products of decay are disturbed and brought to the surface by voluntary and accidental agencies there are the strongest reasons for the conclusion that the sum of human suffering and the records of mortality are largely swelled by these influences.

Cemeteries are a growing evil and a danger. They encroach upon the domain of living men and their uses. They pollute the air and the water. On generation of men rovels out its little life upon the earth, passes away and gives place to a succeeding one. But cemeteries seem designed to endure forever. Etc., millions of people in our own land walk the earth today. Where shall they

and the gaudy trappings of the grave. There is some force, it is admitted, in the objection, the only plausible one, to cremation that it would destroy evidences of crime which might be obtained by the exhumation of bodies. But instances are so rare of conviction of criminals, brought about by evidence thus obtained that the preservation of bodies in the earth with their dangers to the living would not be justifiable on that account. In a portion of the instances in which poison has been detected in the exhumed body it was impossible to determine whether it had been introduced into it before death or after it to thwart the ends of justice. Notwithstanding official vigilance and the rigid application of legal processes a very large proportion of the criminals of our country go untried of justice. It were better that a few more should escape the penalty due to their crimes than that thousands of innocent children should perish.

Death should be robbed of all its terrors. The shabbiest of fears that weigh upon the minds of many who approach the dark valley are those of premature burial and body smothering. They may be dispelled as perfectly as can the body be. We might exclaim with Goethe: "O for the life custom of the ancients to disinter!" The perfect, the lightness of human form which nature carefully and slowly built. After the spirit, the efficient has been severed, by the action of purest flame. The delicate remains of skull and of bones. That these arms, in vain extended, May hold out something that this life heart, Which is slowly is granulating into empty space I still may press what is its melancholy own.

CITY COUNCIL.

A Number of the Councilmen go to the Gold Mines.

There was but a small attendance at last night's meeting of the City Council and no business of importance was transacted.

Leave of absence was granted Councilman Burkhardt for thirty days, Street Commissioner Palmer for fifteen days, Councilman Waters fifteen days and Councilman Thornburgh for fifteen days. A communication from the Board of Education recommended the appointment of Judge M. A. Luca as commissioner of the municipal improvement fund No. 1 was read. The matter of appointing the commissioner was then taken up and the School Committee reported adversely upon the Mayor's appointment of Joseph Thielen. The committee represented that the School Board wanted M. A. Luca who would serve without compensation while Thielen would not serve for less than \$35 per month.

A permit granted to erect a frame building on block 123, lots K and L, was withdrawn on motion of Councilman Levi.

A resolution ordering the sidewalking and curbing of D street between California and Arctic was adopted.

The Tax Collector was instructed to return the money paid by J. D. Works on a double assessment.

After considering the petition from George Foster for a right of way through the City Alleyway stating that it had been in his possession for twenty years with

LAKESIDE HOTEL, El Cajon Valley

For the accommodation of guests we have arranged for the running of a regular carriage from San Diego on Wednesdays and Saturdays at 1 o'clock p. m. Parties will notify the office of the El Cajon Valley Company, Pierce-Morse Building, San Diego, one day in advance of trip and arrange seats. Parties of three or more can secure private conveyance at the Company's office on any day. Hotel is in first class condition and rates reasonable. Rooms, gas, electric light and telephone. Twenty miles inland from San Diego. A Livery Stable is now connected with the Hotel for the accommodation of the public.

EL CAJON VALLEY COMPANY.

We offer on Special Terms for the next 90 days

LANDS OF THE EL CAJON VALLEY COMPANY,

Including the noted "Benedict Tract" of 600 acres, are now offered and placed on the market in subdivisions of 10 acres and upwards, on both sides of the San Diego river. It stands UNEQUALLED IN SOIL, CLIMATE AND SCENERY. All fruits of southern California grow here to perfection without irrigation, and this land has been selected for the raising grain and stock, of which there are now 600 acres in the valley. Water abundant from the EL CAJON RIVER, wells or springs. A RAILROAD IS UNDER CONSTRUCTION TO LAKESIDE, the townsite on this estate, near LINDO LAKE, overlooking Lake, river, valley and mountains. The locality is wonderfully picturesque and notably healthful altitude, 4500 feet. Lots on sale. Also beautiful villa sites on LAKESIDE HEIGHTS. Pure mountain water is piped over this tract. All deeds prohibit the sale of liquor. Maps, pamphlets, etc., at the office of the Hotel at Lakeside.

Office, El Cajon Valley Land Company, Pierce-Morse Building M. MERRILL and G. H. MANSFIELD, Managers

T. Gray & Company,

series seem designed to endure forever. Fifty millions of people in our own land walk the earth to-day. Where shall they be laid, and where the millions of the next generation? The moving tides of living humanity will be turned from their channels to give way to the advancing armies of the dead. Says Sir Henry Thompson, "No dead body is ever placed in the soil without polluting the earth, the air and the water about it." The experiments of Pasteur and others have shown that earth worms bring to the surface trillions of bacteria from the bodies of decomposing dead.

No successful means of counteracting these destructive agencies have been discovered. All known disinfectants are under some circumstances imperfect and unreliable, as of difficult or impossible application. Those upon which the greatest reliance has been placed are too often only deodorants. The only true disinfectant is fire.

While there is nothing in the process of incineration of bodies calculated to detract from a becoming reverence for "the mould once hallowed by the Almighty's breath," it is calculated to detract in every degree from the superstitious reverence now prevailing for "the muddy verdure of decay, which doth grossly close us in" the barren casket, from which the gem—the man himself—has fled forever.

The method of cremation furnishes us with a restfulness in the ashes derived from the actual substance of the body of the departed—a tangible memento—which may be honored and preserved with all the care and reverence, and adorned with all the beauty which a refined taste can suggest. The preservation of such a memento in the case of earth-burial would be impracticable and most undesirable. Every consideration of value is in favor of cremation. Objections to it are of sentiment and not of reason. They exist usually only in the minds of those who have extremely contemplated the subject.

In such minds it seems associated with the fagot, the funeral pyre and the rude processes of the ancients. In imagination the dead body is still enshrouded with animation and in the cremation are kindled anew the fires of the incineration. The modern method accomplished by suitable apparatus, has so little similarity to these heathenish practices as to constitute a very different process. The latter is conducted with all due regard to the most tender sensibilities of the friends of the deceased, and although carried on in the midst of a densely populated neighborhood, and to the presence of such spectators as may be permitted to witness it, there is nothing in it to shock or offend the senses. The body enveloped in a sheet saturated with a solution of alum or asbestos, is placed by delicate machinery in a retort at white heat—2000° to 2500° Fahrenheit—and is quickly and beautifully dissolved in the air without visible flame or vapor, all gases being consumed in the retort. Contemplate for a moment the beauty of this transformation compared with the stages of slow decay through which the buried body is compelled to pass in order to reach the same end through oxidation, which, in either case is a combustion by which it is returned "earth to earth, ashes to ashes and dust to dust." In the latter case we contemplate the forms of loved ones presenting spectacles too shocking to desire to witness or to permit the thoughts to dwell upon; the ghastly remains of poor mortality being even more repulsive by contrast with the pomp of funeral pageant.

George, order for a rebate on the assessment and refusing to upon the report of the City Attorney stating that it had been paid by two different persons with out a protest from either the Council adjourned.

CITY AND COUNTY.

Larry Barton is on the street again after a severe attack of rheumatism.

Eugene Franzén was the happiest painter on the streets yesterday. Mr. and Mrs. Franzén have a seven-pound boy.

The masquerade ball at Turner's hall last evening was a grand success, and was attended by a great many Turners and their friends.

P. J. Hevey has resigned from the Hotel Brewster force and will go to Lakeside tomorrow to take charge of the dining room of the hotel. Mrs. Hevey will also accept a position.

There will be a meeting to arrange for the second annual Flower Festival, Thursday afternoon, March 7, at 3 o'clock, in the Tabernacle, corner of F and Ninth streets. All ladies interested are requested to be present.

They Want the Orlole Concert Again.

We have been requested by quite a number to suggest the repetition of the Orlole concert, as many persons were turned away on the night of the entertainment for lack of room. Interviewing Mrs. Morgan on the subject she replied, she did not feel quite equal to the work at present, as her pupils occupied so much of her time, and the double duty was not inviting. The thought occurred to me that Mrs. Morgan and the question was asked how she could use her voice so much in the labor of teaching and still preserve its sweetness and purity of tone, and how she acquired so perfect a trill. Her reply was, "Theory, and I practice what I teach. My theory has kept my voice as fresh to-day as it was fifteen years ago."

Her practice and theory have done so much for Mrs. Morgan that it should be a stimulant to the large number of young people in our city who have musical talent to study and cultivate a gift more prized than all other gifts of nature.
